RBG.AI

Structuring the Unstructured Data

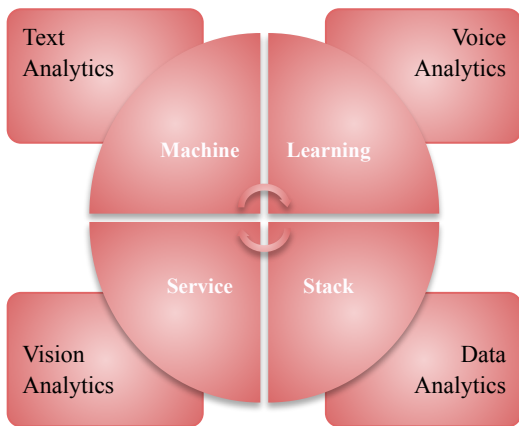

Text-Voice-Vision-Data

$\langle \gamma \beta \delta \rangle$

RBG.AI

Structuring the Unstructured

We are Mathematicians who practice Software Engineering envisioned to democratize disruptive AI solutions for sustainable business growth.

Strong Team	18+ Practitioners with 1 to 10+ Years of Experience
Team Foundation	100% Masters and 30% PhD in AI
AI Skills	Data Collation, Conventional Machine Learning, Deep Learning, Interpretations, Model Serving and Visualization
Language	Python, R, Java, SQL and Matlab
Cloud	AWS, GCP and Azure
Cloud AI	Google Cloud AI, Azure AI and AWS AI
Distributed	Hadoop and Spark

RBG.AI

Key Members

Member	Role	Specialisation & Experience
Mr. Barathi Ganesh HB	Business Head & Co-Founder	Technologist with 8+ years of industrial AI experience and Pursuing PhD in AI with 50+ publications
Ms. Reshma Unnikrishnan	Research Head & Co-Founder	Technologist with 4+ years of industrial AI experience and Pursuing PhD in AI for Healthcare with 8+ publications
Mr. Shyam R	Solution Head	Technologist with 10+ years of industrial AI experience and Pursuing PhD in AI for Signal Processing with 4+ publications
Dr. Soman KP	Technology Advisor	Professor at Amrita Vishwa Vidyapeetham and one of the top AI scientist in India
Mr. Gohil HK	Business Advisor	Director at TES with 30+ years of experience in Telecom Industry and has expertise in business operations, sales & marketing and technical support
Mr. Jatin Zala	Sales Advisor	Executive VP at TES and has 28+ years of experience in pre-sales, business development, projects and managed services.

The Problem

Skill Availability, Domain Expertise, and AI in Production

Skill Availability, Domain Expertise, and AI in Production

We knew how challenging it was for non-technical people to create custom AI solutions and process automation using AI.

Due to the impact on workforce management, access to developers, and the delay caused by the absence of software engineers with domain expertise, businesses must move towards no-code AI platforms.

The Solution

No-Code Platform for enabling AI for Everyone, and Evidencing AI in Production from Day 1

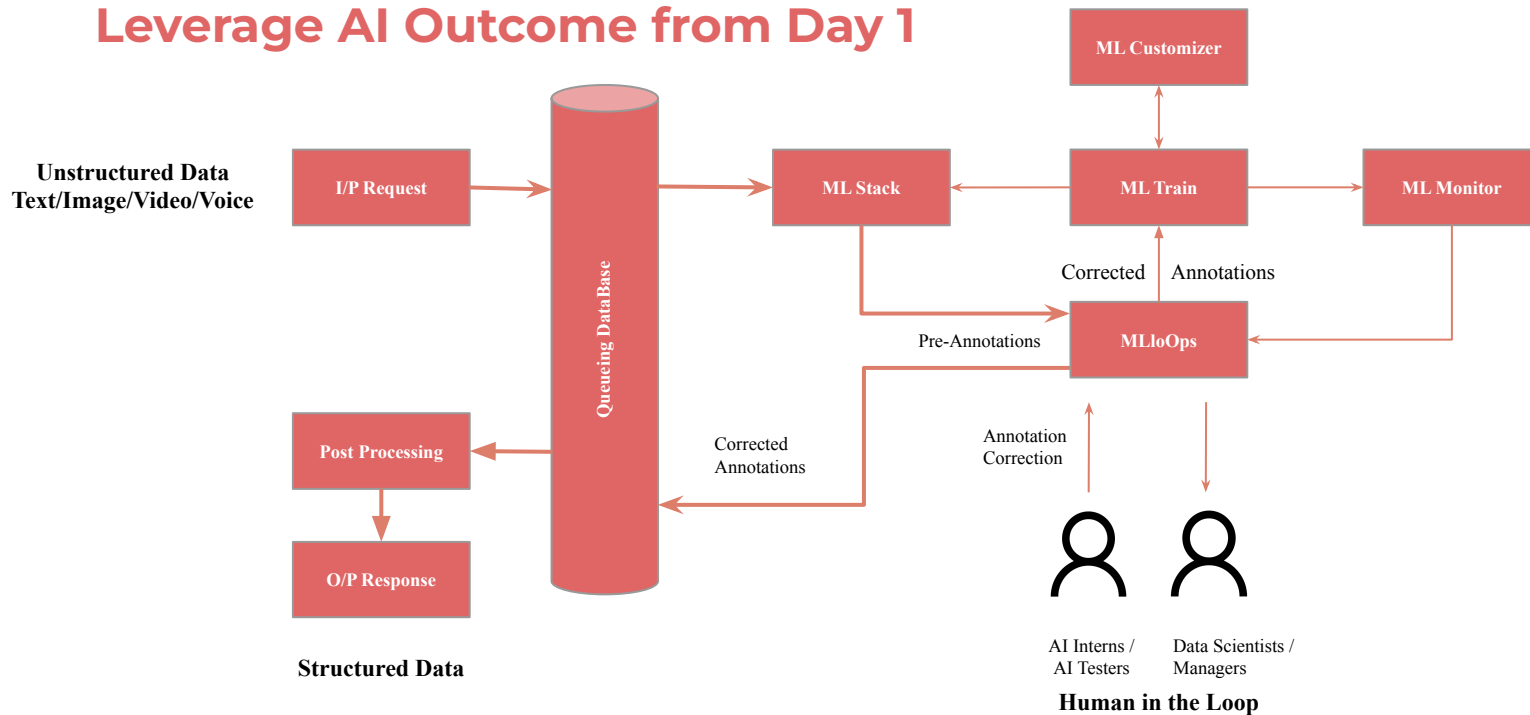

No-Code Platform for enabling AI for Everyone, and Evidencing AI in Production from Day 1

By orchestrating a suite of AI tools, **MLloOps** is built for enabling domain experts, employees, and students to create apps and systems without having to write traditional programs for them.

The fundamental functionality is instant access through cognitive load-reduced visual interfaces, facilitated user actions, and pre-built integrations with other tools to build custom AI applications.

MLloOps in Action

Leverage AI Outcome from Day 1

MLloOps

Task & Expertise Matrix

Domain	Tasks	Applications
Text	Text Classification	Sentiment Analysis, Intent Classification
	Named Entity Recognition & Relation Extraction	Information Extraction, Data Augmentation
	Text Classification, Named Entity Recognition & Relation Extraction	Chatbots, Question Answering systems
	Text to Text	Type a head, Grammar Correction, Decoder for OCR & Speech to Text, Machine Translation
Image	Image Classification	Face , Form layout , Cheque type , Form type identification, Emotion Identification
	Object Segmentation	Separation of floors, Separation of backgrounds
	Object Detection	Geometrical Shape , Machining feature, Number plate, Face Detection, Floor Plan , Pose Estimation
	Image to Text	Handwritten and Printed Text Recognition
	Image to Image	2D to 3D imaging, Video to Point Cloud Conversion
Speech	Speech to Text, Speaker Diarization	Extract text from the speech signals
	Text to Speech	Generate Speech Signal from the text
	Speech Classification	Sentiment and Emotion Recognition, Speaker Recognition, Keyword Spotting
	Speech to Speech	Noise Removal, Voice Cloning
Numeric	Recommendation System	Recommendation Engine
	Visualization	Data Visualization, Inference Justification, Feature Importance
	Sequence Analysis	Fraud Detection, Anti Money Laundering, Stock Market Prediction, Vibration Analysis

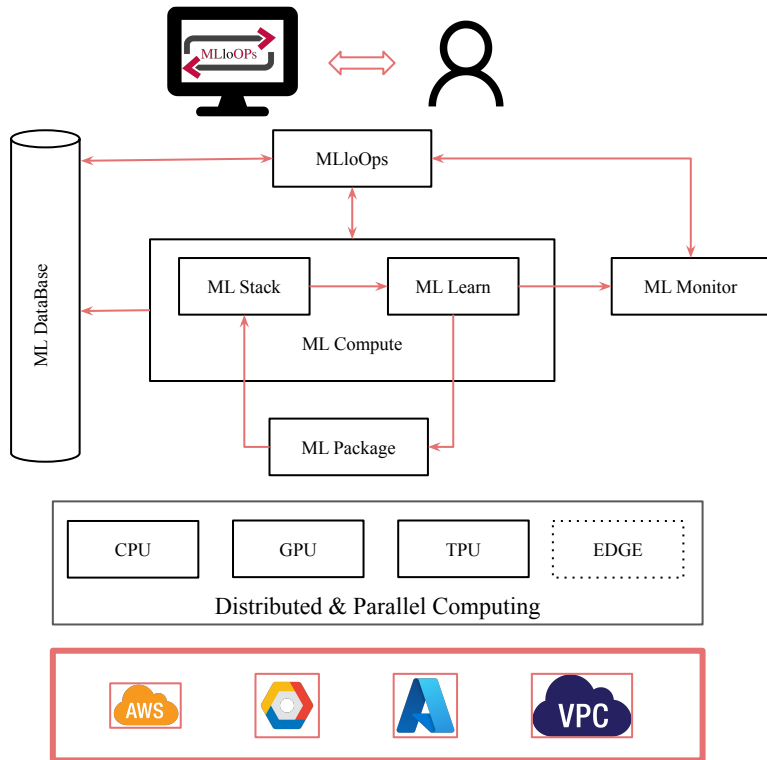

MLloOps

A Human-Machine Loop for Accelerating Data Driven
Machine Learning Workflows

$\langle \gamma \beta \delta \rangle$

MLIoOps

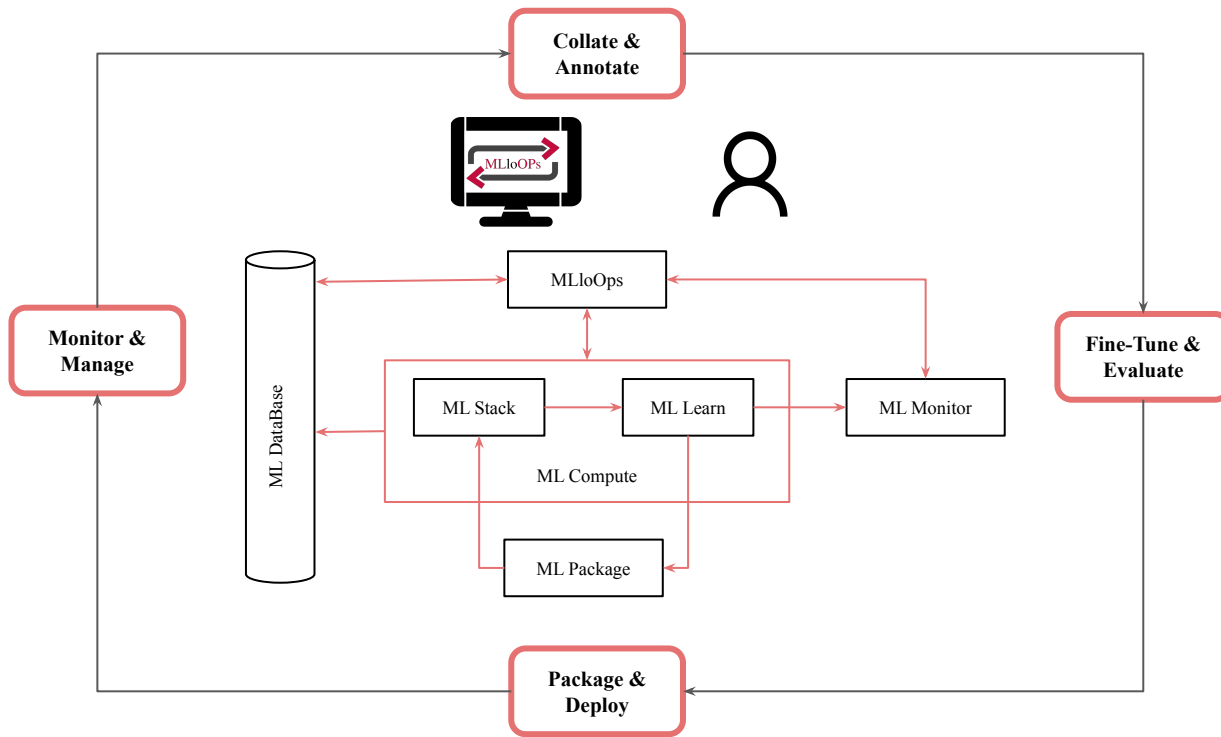

Develop & Deploy Anywhere

- ❖ Collaborative & Customizable code-less end-to-end AI software development platform.
- ❖ Structure the Unstructured Data in any format (Text, Audio, Image, Video and Numbers).
- ❖ Customize SOTA data-driven model for application of your interest.
- ❖ ML core customization for reduced post processing efforts.
- ❖ Always stay ahead with model's continuous learning and training capabilities.
- ❖ Flexible to deploy at public and private clouds.

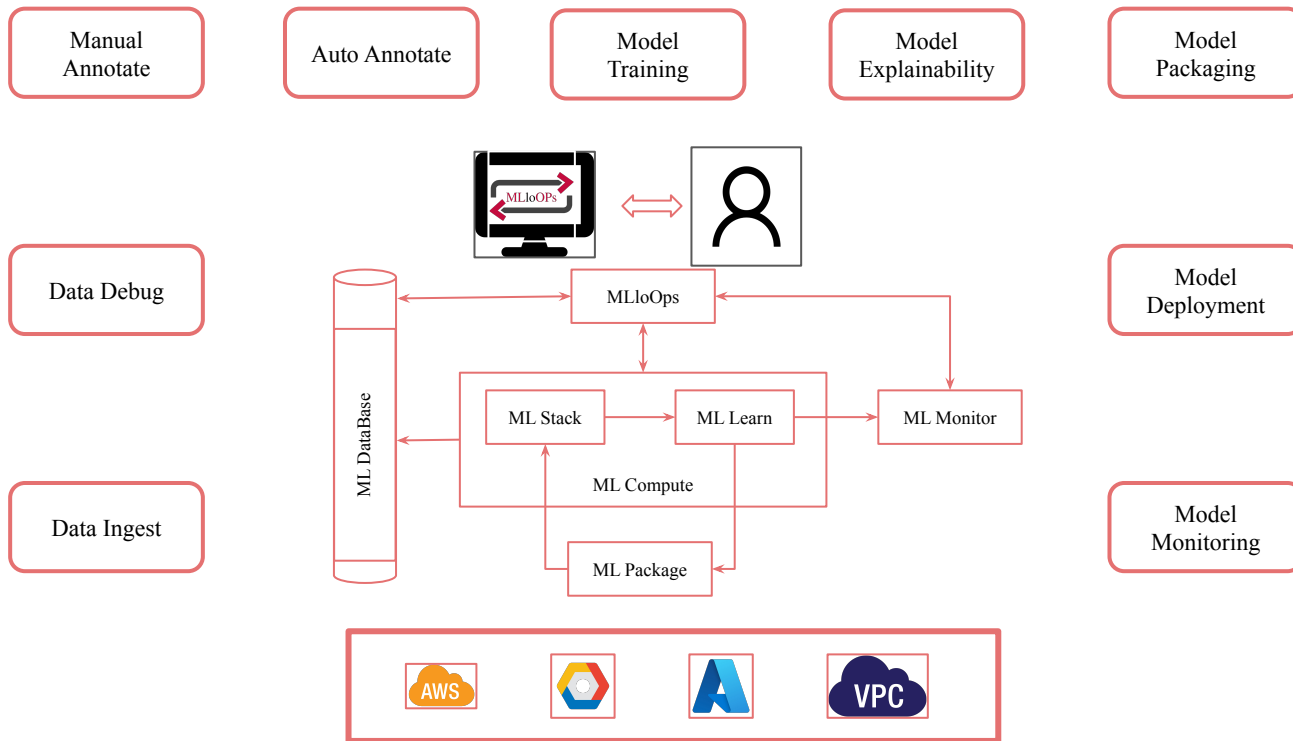

MLloOps

Accelerated AI Workflow

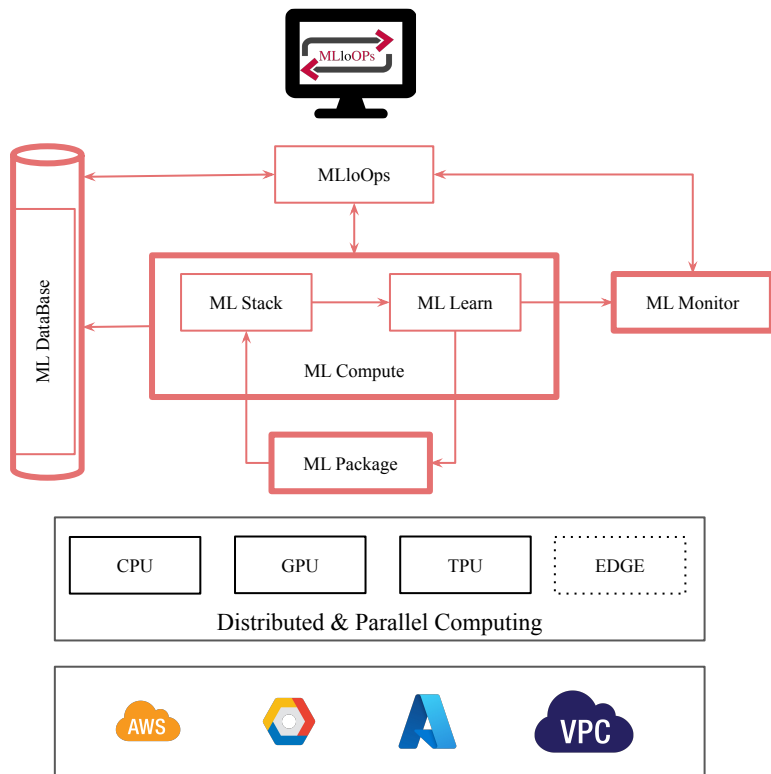

MLioOps

Evident the Accelerated AI Workflow

MLloOps

Optimized Data-Model-Computation

Data

- Versioning
- Manual Annotation
- ML Annotation
- Transformation

Model

- Versioning
- Tracking
- Orchestration
- Packaging
- Deploying
- Serving

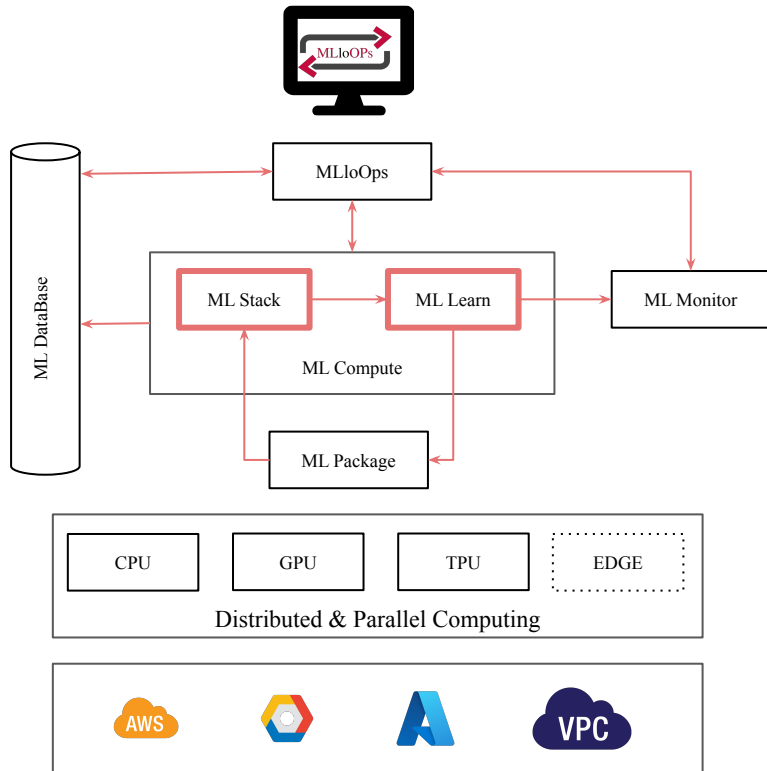

Compute

- Parallel Computation
- Distributed Computation
- Low Latency
- High Throughput
- Training & Deployment

MLioOps

Leverage Data-Driven SOTA Models from ML Stack

Text
Analytics

- Profiler
- Opinioner
- Translator
- Sequence Modeler

Vision
Analytics

- Transcriber - OCR
- Table Detector
- Structure Extractor
- Relation Extractor
- Image Classifier

Voice
Analytics

- Transcriber
- Profiler
- Opinioner
- Enhancer
- Diarizer
- Synthesizer

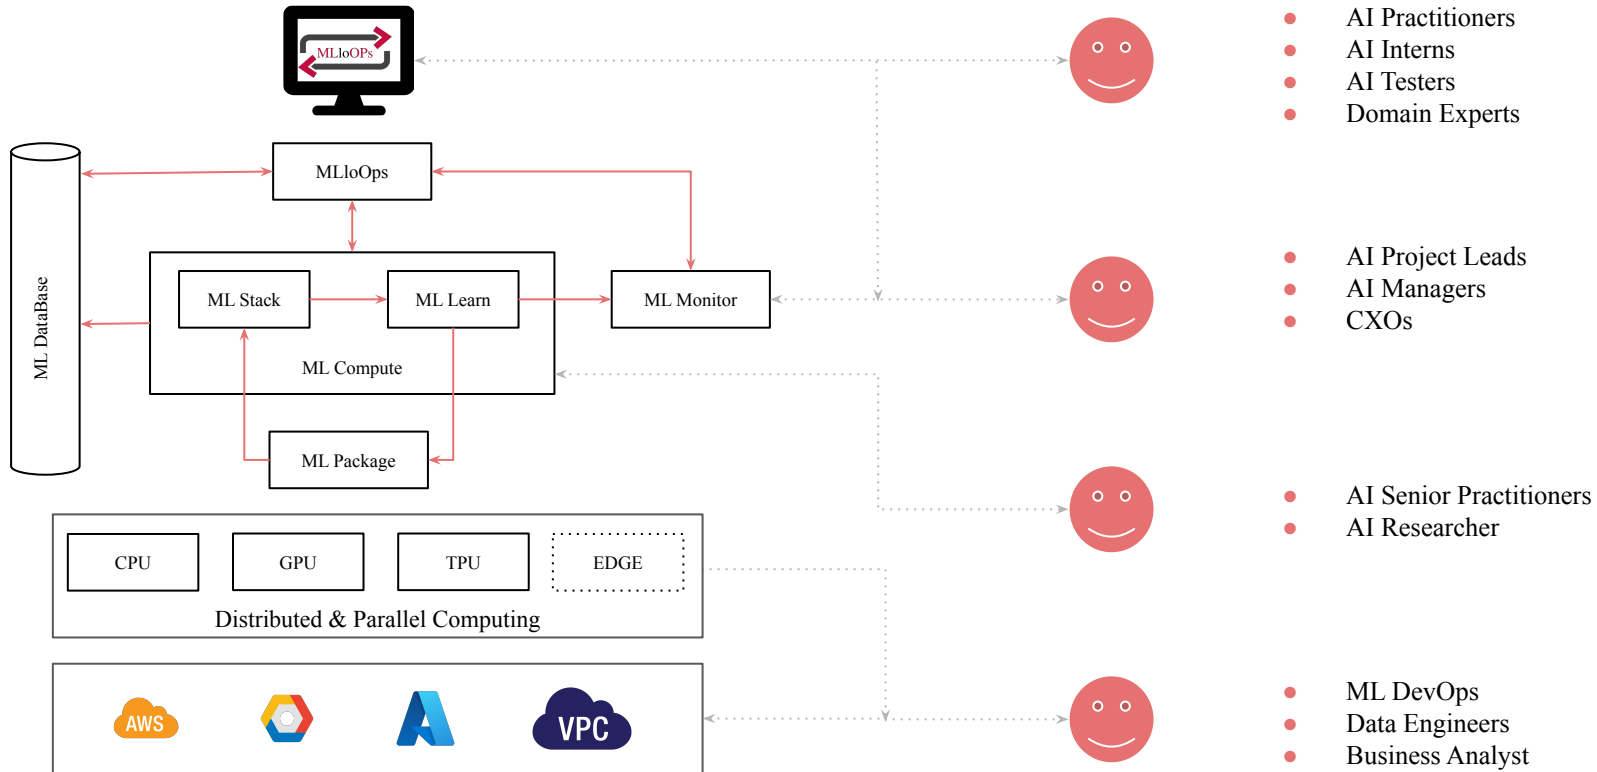

Data
Analytics

- Anomaly Detector
- Recommender
- Sequence Predictor

MLloOps

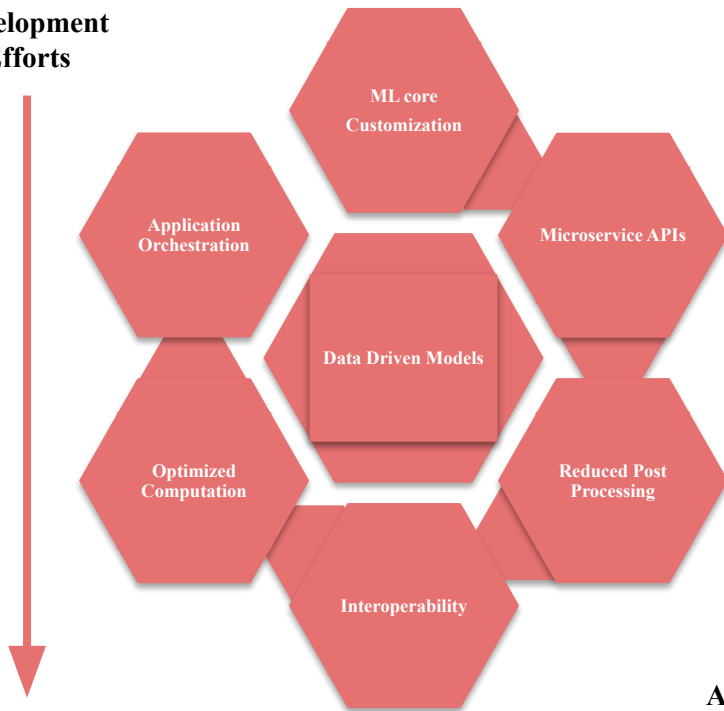

One Platform for All Stakeholders

MLIoOps

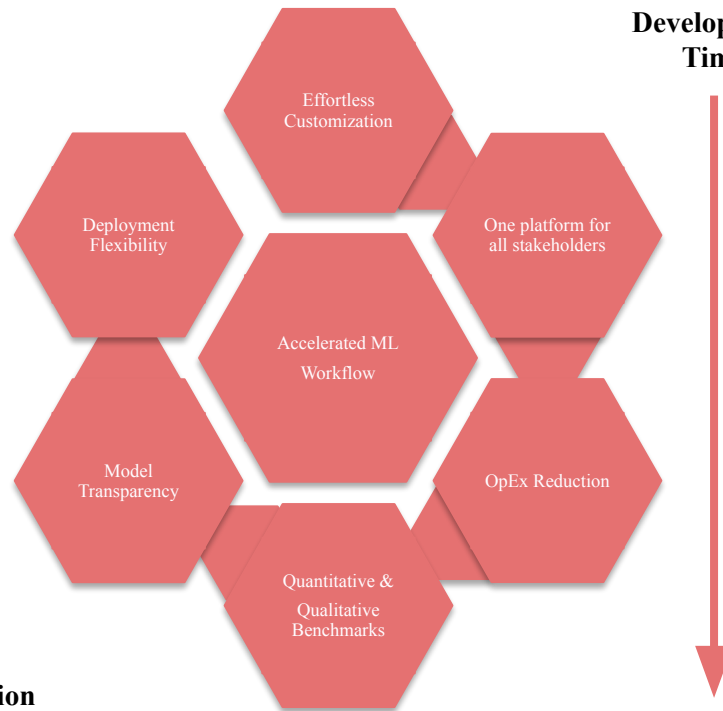

High Performance in Optimal Time

Development
Efforts

Application

Voice-in-Sights

MLioOps

Deployed & Prototyped Solutions

Client	Solution	Status
	Captcha Recognition	Deployed
	Information Extraction - Custom Documents BoE & SBS	Deployed
	Information Extraction - Air Ticket Invoices, EB Bills	Demonstrated
	Tender Document Information Extraction & Virtual Interaction	Deployed
	Email Parsing & Information Extraction	Demonstrated
	Questionnaire Voice Bot, Voice Enhancer	Deployed
	2D Floor Plan to 3D Model, Machining Feature Recognition	Demonstrated

Thank You!
